

COMBINED BOX ERECTOR & PACKAGING

COMBINED SYSTEM The Multipacker is a multi-functional unit, which erects and packs boxes in one swift process. It can handle different packaging patterns and box types - including taping and closing of flap lids. The Multipacker is also movable and can be moved to any part of the production line that needs a helping hand.

HARDWORKING ROBOT The Multipacker can replace many of the daily routine packaging tasks, which are often carried out by your staff. It is a cost efficient and flexible packaging solution which is intended for a mass production environment with variable packaging needs.

AN EXPERIENCED PARTNER VARO is a certified ABB partner and has years of experience working with highly specialised robotic packaging. You will be able to draw on the experience of our experts, who will guide you to the perfect set-up.

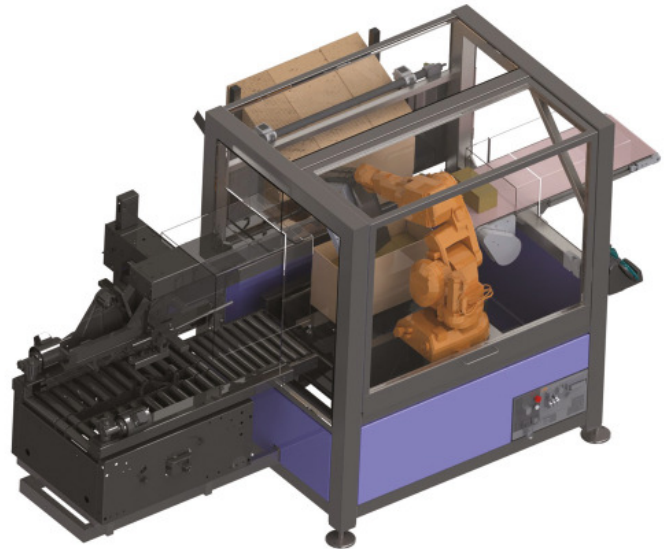

A HARDWORKING ROBOTIC EMPLOYEE

The VARO Multipacker is a multifunctional standard unit, which erects boxes and packs them in one process. This makes for a very flexible packaging solution, which can be adapted to several different box types and packaging patterns. As the unit is also movable it can be used at a number of different packaging points along your production line. In other words - the Multipacker is the most flexible and hardworking employee you'll ever have.

SPECIFICATIONS

Elements	ABB robot with control unit
	VARO gripping device
	Taping (top and bottom)
	Closing and folding of lids
Size (for 3530 box)	1830 x 1830 x 1880 mm
